

## Demo and explanation of Wazuh - Alex Dibbo

*Wednesday, 9 October 2024 14:00 (30 minutes)*

Wazuh is a security operation tool providing vulnerability and configuration assessment, log analysis and incident response capabilities.

In the Cloud we are rolling out Wazuh to all of our servers, virtual machines, images and clusters.

I'll go through what we can see from it, how we configure it and what we are planning to do with it going forwards.

**Presenter:** Mr DIBBO, Alex

**Session Classification:** Division Discussion
