

PPD Seminar

Subterranean Science and Ultra-Low Background Studies at Boulby

Ed Banks (PPD/Boulby Mine)

27 Nov 2019, 11:00 CR3 (R61 RAL)

An overview of the current facilities and experiments at Boulby Underground Laboratory, as well as where Boulby might be going in the near future. I'll be looking at why sometimes in order to get to space we have to go underground; the pros and cons of being a kilometer beneath the surface; and Boulby's interdisciplinary experiments from particle physics to biology to nuclear security.

ALL WELCOME
