

Introduction- additional priorities for the future

Thursday, 9 January 2025 10:45 (15 minutes)

Opportunity to make specific statements on the list of non-physics considerations for the future. These will not be prioritised (we hope we can agree they are all important) but there are specific statements we may want to make on each of these areas:

- Long-term perspective
- Financial and human resources: requirements and effect on other projects
- Timing
- Careers and training
- Sustainability

Session Classification: Session 1
