M-07: Cryogenic materials testing and methods (14:00 - 16:00)

time	[id] title	presenter
14:00	[96] M-07: 238 - Metallurgical changes of cryogenically created coated carbide and its performance while wet machining austenitic stainless steel – 310	
14:40	[97] M-07: 131 - Design of device for thermal emissivity measurement at low temperature based on cryocooler	
15:20	[98] M-07: 022 - Fatigue cyclic testing of the ITER CS inlets
