

PPD Seminar

Study of the doubly charming particles at LHCb

Prof Jibo He (UCAS, China)

2 Oct 2026, 14:30

CR12 R68 (RAL)

After a brief introduction to the LHCb experiment and its upgrade, I will focus on systematic studies of the doubly charmed baryons, including the observation of the Xicc⁺ baryon in 2026, which is the first new particle observed with the upgraded LHCb detector.
