

Experimental practicalities part 2

Wednesday, 9 February 2022 14:15 (45 minutes)

- Things to check during measurements
 - ~ Wavelength slicing in ToF SANS.
 - ~ Incoherent and inelastic scattering.
 - ~ Balancing scattering and attenuation.
- Sample environments
 - ~ What kind of samples can be studied.
 - ~ Simple sample holders for SANS (cuvettes or no cuvettes, cans). Compare to SAXS (capillaries).
 - ~ Simple perturbations.
 - ~ Advanced sample environments.

Presenter: SMITH, Gregory (ISIS Neutron and Muon Source)

Session Classification: Webinars
