

# ITRF: Project Kickoff Meeting

20<sup>th</sup> September 2022  
ITRF Kickoff Meeting

<https://ukri.zoom.us/j/98909305505>

The collage features logos for the following organizations:

- Imperial College London: Department of Physics, Faculty of Medicine
- ICR The Institute of Cancer Research
- Medical Research Council: Oxford Institute for Radiation Oncology
- Imperial College Academic Health Science Centre
- CANCER RESEARCH UK
- IMPERIAL CENTRE
- Imperial College Healthcare NHS Trust
- MANCHESTER 1824: The University of Manchester
- UNIVERSITY OF BIRMINGHAM
- UNIVERSITY OF LIVERPOOL
- LANCASTER UNIVERSITY
- ROYAL HOLLOWAY UNIVERSITY OF LONDON
- University of Strathclyde Glasgow: DEPARTMENT OF PHYSICS
- UCL: MEDICAL PHYSICS & BIOMEDICAL ENGINEERING
- Swansea University: Prifysgol Abertawe
- UNIVERSITY OF BIRMINGHAM
- UNIVERSITY OF BIRMINGHAM
- POSITRON IMAGING CENTRE
- CYCLOTRON FACILITY
- The Cockcroft Institute: of Accelerator Science and Technology
- Medical Research Council: Oxford Institute for Radiation Oncology
- Medical Research Council: Oxford Institute for Radiation Oncology
- JAI: John Adams Institute for Accelerator Science
- CCAP: Centre for the Clinical Application of Particle
- NHS: Imperial College Healthcare NHS Trust
- NHS: University Hospitals Birmingham NHS Foundation Trust
- NHS: The Clatterbridge Cancer Centre NHS Foundation Trust
- institut Curie
- UKRI: Science and Technology Facilities Council
- ASTeC: Particle Physics Department, ISIS Neutron and Muon Source
- INFN: CATANIA
- UKRI: Science and Technology Facilities Council
- ASTeC: Particle Physics Department, ISIS Neutron and Muon Source
- UNIVERSITY OF BIRMINGHAM
- POSITRON IMAGING CENTRE
- UNIVERSITY OF BIRMINGHAM
- CYCLOTRON FACILITY
- Corerain: 鲲云科技
- The Rosalind Franklin Institute
- NPL: National Physical Laboratory
- LEO: Cancer Care
- MAXELER Technologies: Maximum Performance Computing
- LhARA: Large Hadron Accelerator Research Association

# ITRF Kick-Off Meeting Agenda

Agenda		
Science		
Time	Item	Speaker
14:00	Welcome and Meeting Introduction (Massimo Noro)	Massimo Noro
14:05	Background to ITRF – the Science (10/10/10 min)	Jason Parsons, Karen Kirkby, Amato Giaccia (by Zoom)
14:35	What is ITRF? Facility Concept; Who is Working on ITRF? (10 min)	Hywel Owen
14:45	LhARA (30 min)	Ken Long
15:10	The NIMMS Programme and He Synchrotron (10 min)	Elena Benedetto (by Zoom)
15:20	Break	
Project		
15:30	ITRF Project Management (15 min)	Neil Bliss
15:50	WP1 LhARA: project, technical risks and management (25 min)	Colin Whyte
16:15	WP2 Facilities and Costing (10 min)	Neil Bliss
16:25	WP3 Synchrotron/Conventional Option (10 min)	Karen Kirkby
16:35	Immediate Next Steps (10 min)	Massimo Noro
16:45	Discussion	
17:00	Meeting Close	

<https://ukri.zoom.us/j/98909305505>

# What is ITRF?

Hywel Owen (on behalf of the ITRF project)  
STFC Daresbury Laboratory  
Accelerator Science and Technology Centre

20<sup>th</sup> September 2022  
ITRF Kickoff Meeting  
<https://ukri.zoom.us/j/98909305505>

# Why protons? Why ions?

UK position and clinical justification:

<https://www.birpublications.org/doi/10.1259/bjr.20200247>

$$-\frac{dE}{dx} = \frac{4\pi}{m_e c^2} \cdot \frac{nz^2}{\beta^2} \cdot \left(\frac{e^2}{4\pi\epsilon_0}\right)^2 \cdot \left[ \ln\left(\frac{2m_e c^2 \beta^2}{I \cdot (1 - \beta^2)}\right) - \beta^2 \right]$$

# ITRF: Ion Therapy Research Facility

## Beyond protons, for cancer treatment

### WHY

- one in two people will develop cancer in their lifetime in the UK
- conventional radiotherapy used in around 50% patients
- ion therapy may offer benefits for certain patients, but the basic radiobiology needs exploring

### WHAT

- a world-first infrastructure for proton/ion beams towards cancer treatment
- a flagship project for the region, building on the UK's research community strengths and the science and innovation heritage of the national laboratories

# Ion Therapy Research Facility – the ambition

## HOW

- A compact, single-site national research infrastructure delivering very high dose rates
- Protons and beyond, at energies sufficient for both in-vitro and in-vivo studies
- Consider technical options, with different risk profiles

## PROPOSED PLAN

- Conceptual design of layout, cost and operation of a research facility
- Develop innovative laser-plasma technology, building upon world-leading expertise within the LhARA collaboration
- Develop innovative end-station designs, building on existing UK expertise in proton radiobiology research
- Collaborative agreement with CERN allows us to benefit from enormous experience and expertise in accelerator technology and successful projects

# Building on the NHS success: proton beam therapy

- The first ion in clinical use in the NHS is the **proton**
- The NHS approach with proton beam therapy is:
  - evidence-based with intention to cure
  - emphasis on children & young adults, under 25
- Intend to build on experience gained in proton therapy clinical and research activity

**NHS**  
The Clatterbridge  
Cancer Centre  
NHS Foundation Trust

# The Clinical Context

- 1989: Clatterbridge UK world's 1<sup>st</sup> hospital proton therapy centre (62 MeV, ocular); 100 patients/year
- 2007: NRAG report 'Radiotherapy: developing a world class service for England' recommends proton facilities
- 2007: Cancer Reform Strategy
- 2008: Proton Overseas Programme; 1102 patients (2008 – 2018)  
<https://doi.org/10.1016/j.ijrobp.2020.07.2456>  
<https://doi.org/10.1016/j.clon.2018.02.032>
- 2012 NHS Strategic Outline Case
- 2015: Full Business Case approved for 2 NHS centres
- 2018: NHS Christie 1<sup>st</sup> patients –  
**seen as a big success story**
- 2021: NHS UCLH 1<sup>st</sup> patients

Clatterbridge – 62 MeV Scanditronix cyclotron  
Basis for much UK technology and clinical-related research

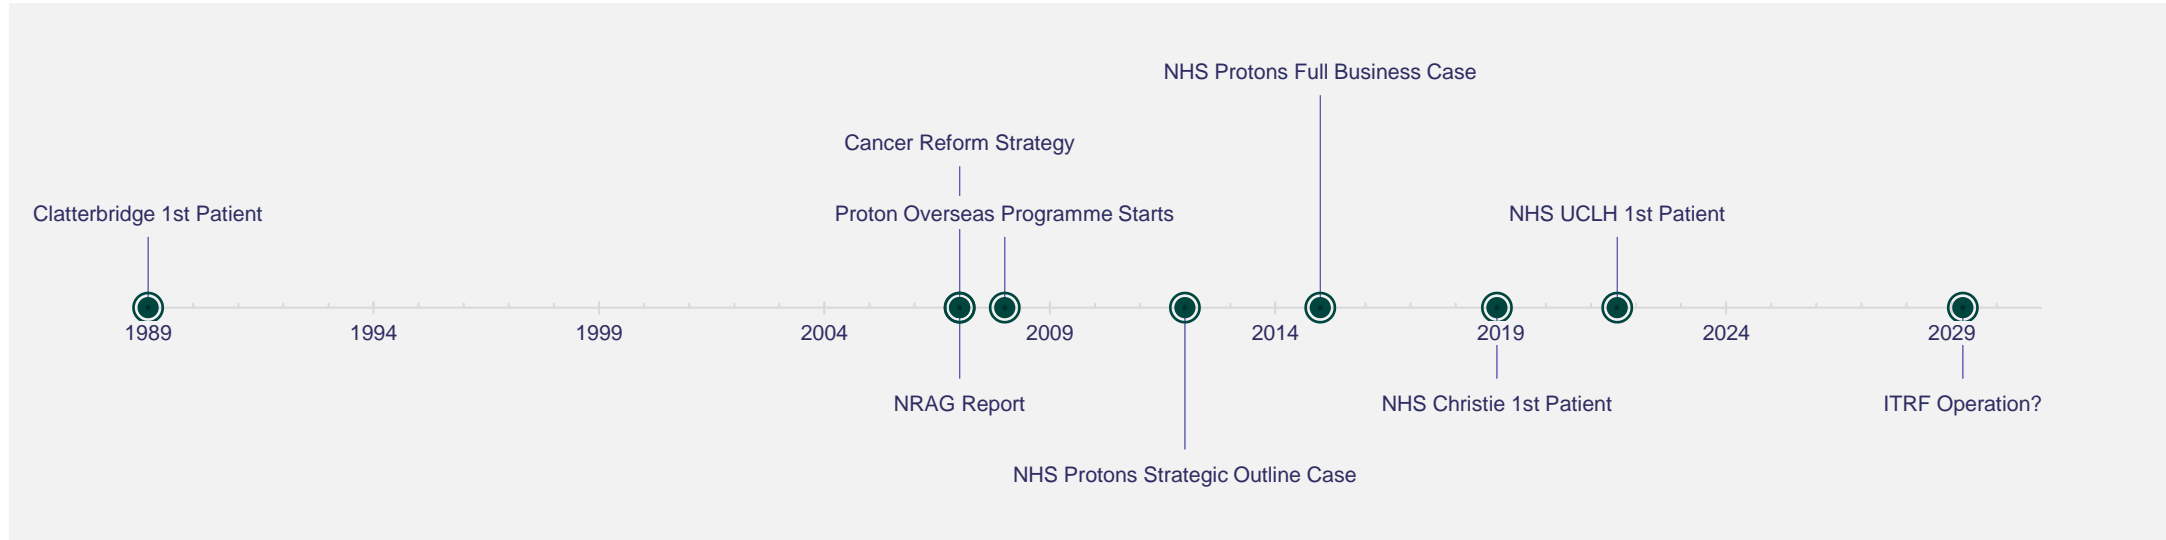

Christie – 250 MeV Varian cyclotron  
+ unique research beamline

## Protons in UK:

- Evidence-based
- Intention to cure
- Emphasis on children, young adults (<25), adults with rare tumours

# ITRF Timeline – Where Do We Want to Get To?

	YR	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41		
ITRF	PA1 ITRF Conceptual Design	█																					
	PA2 ITRF Technical Design		█		█																		
	Construction				█		█		█														
	ITRF research - physics + pre-clinical biology				█		█		█		█		█		█		█		█		█		
Ion Overseas Programme	Appraisal of clinical evidence		█		█																		
	Partner Research Programmes		█		█																		
	Referral Programme				█		█		█		█		█		█		█		█				
	Cost Analysis									█													
CRTF	CRTF Technology Collaborations	█																					
	CRTF Conceptual Design							█															
	CRTF Technical Design								█														
	CRTF Tendering										█												
	CRTF Construction												█		█		█		█				
Clinical Research & Treatment Facility	Commence clinical research & treatment																	█		█		█	

# ITRF Status & Plan

- ITRF funded through UKRI Infrastructure Fund
- 2-year Preliminary Activity would deliver a CDR to address:
  - What research programme ?
  - What design ?
  - What cost basis ?
  - What operating model ?
- During the Preliminary Activity:
  - Working groups to produce Conceptual Design Report, outline design and costing
  - Review designs with community
  - Establish funding roadmap
  - Develop key technologies
  - Examine alternative ways to achieve research goals
- STFC – CERN have agreed an Umbrella Collaboration Agreement to provide a framework to enable free exchange of ideas and technologies that is very relevant to ITRF (NIMMS project)

# Partner/Collaborating Organisations

- STFC (BID, ASTeC\*, TD\*, ISIS, CLF, PPD\*)
- John Adams Institute/Cockcroft Institute
- University of Birmingham\*
- Imperial College (Physics\*, Computing, Aeronautics, Surgery and Cancer)
- Imperial College Healthcare Trust\*
- Lancaster University\*
- University of Liverpool (Physics\*, Sys Mol Biol)
- University of Manchester (Physics\*, Cancer Sciences\*)
- University of Oxford (Physics, Materials, Oncology)
- QU Belfast\*
- RHUL\*
- University of Surrey
- Swansea University
- UCL \*
- University of Strathclyde\*
- Christie Hospital
- Clatterbridge Cancer Centre

- Institute of Cancer Research\*
- Rosalind Franklin Institute
- National Physical Laboratory
- CERN
- INFN Catania
- Leo Cancer Care
- Maxeler Technologies Limited
- Corerain Technologies (China)
- Institut Curie
- Netherlands Cancer Institute
- Hampton University
- Stanford University
- Cyril & Methodius University (N Macedonia)
