## Take it with a pinch of salt: what you can learn from alkali halides about muon sites and quantum coherence

*Thursday, 5 September 2024 10:30 (30 minutes)*

A key problem in  $\mu$ SR is to work out the site or sites of the implanted muon. I will talk about some new results on muon sites in alkali halides and also how radiofrequency pulses can be used to control the muon and nuclear spins in these systems.
